AQUALEE

— Pioneer your pool future

AQUALEE, a brand under the Daisy Power umbrella, is dedicated to innovating new products, creating a harmonious balance between cutting-edge technology, timeless design, and energy-saving solutions.

Simplicity and Integration - Our design adapts effortlessly to your space, enabling you to craft a poolside experience that reflects your style and needs.

Brand Personality - Innovation, reliability, premium design, and environmental consciousness, these are the DNA of Aqualee's identity.

LUMINA Base

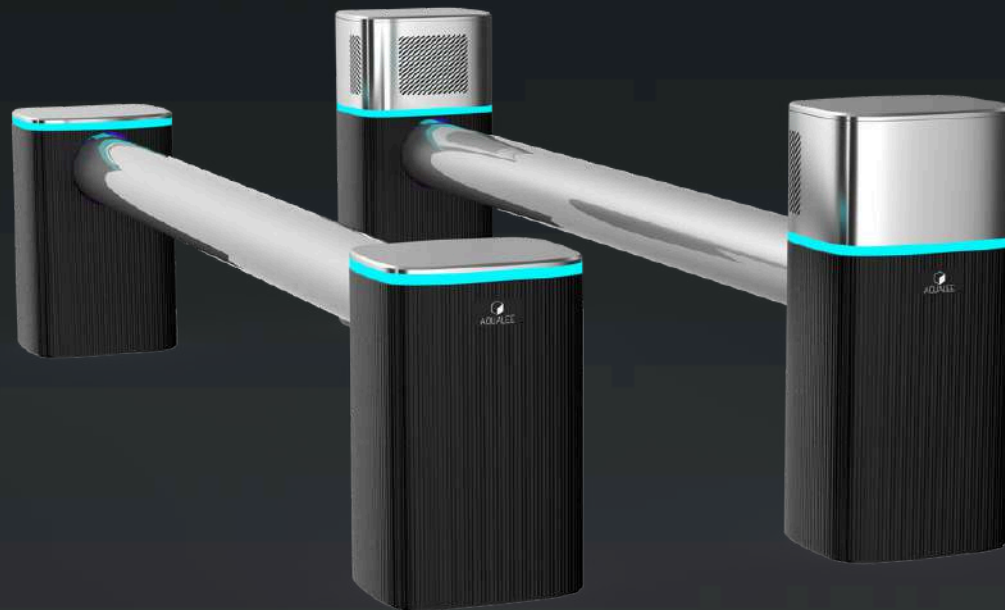

This version seamlessly blends form and function, featuring the RGB Led light strip, enhancing your outdoor space with a touch of practical style.

More than just a **base** for your pool cover usage, it's the foundation of your luxurious outdoor haven.

LUMINA Speaker

This version satisfies an acoustic perfection.

One more speaker module creates a symphony of sound that enhances your poolside retreat. Every moment by the pool becomes a celebration of life's chilling pleasures.

Whether you're seeking modern elegance, eco-conscious solutions, or a touch of luxury, LUMINA offers the perfect blend of beauty and function.

LUMINA Base

Where Innovation Meets Elegance

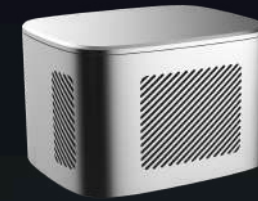

Experience the sophistication of the **LUMINA Base**, meticulously crafted from modern aluminum alloy. Its sleek silhouette and clean lines are accentuated by the innovative RGB LED strip, set against a refined black base and topped with a cover.

As evening approaches, it comes to life, dancing alongside the shimmering waters of your pool, perfectly complemented by the soft glow of your home's exterior lighting.

LUMINA Speaker

High quality speaker

Harmonizing Sound and Space

The **LUMINA Speaker** is a testament to modern design and acoustic excellence. The intuitive click-into-place design allows for effortless installation, while its high-quality audio output envelops your space with rich, immersive sound.

Let the LUMINA Speaker elevate every outdoor moment into a memorable event.

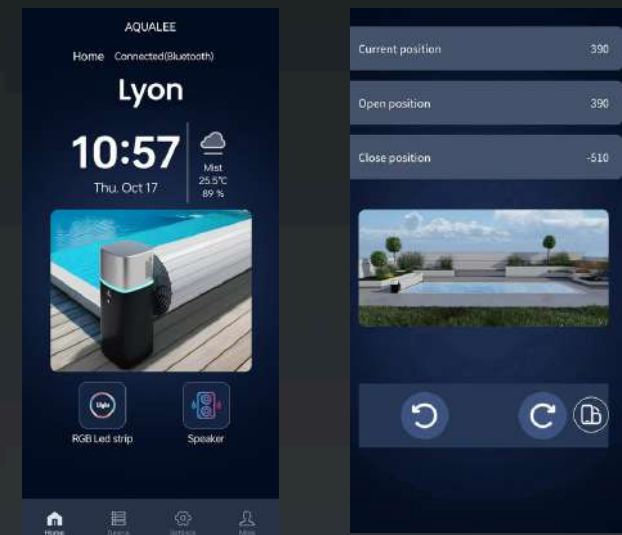

Offering Energy-Saving Solutions

LUMINA series are available in both wired and wireless (battery-powered) versions.

For most above-ground pool cover systems with solar panel charging, the primary challenge is the limited size of the solar panels, which hampers effective battery charging.

AQUALEE's exclusive innovative design integrates the solar panels with the slatted covers, providing ample green energy for the battery while seamlessly blending into the user's garden.

 The exclusive mobile app simplifies controlling your pool cover with just a smartphone!

Specifications

Whether your pool is new or existing, we offer satisfying solutions.
